Spring/Summer 2021

64rd Year - 1st Ed.

President's Message

Debbie Andrews

To all the TLIA Memebers, recreational users , anglers and friends of Twin Lakes, I hope this newsletter finds you and your family outside enjoying all that Twin Lakes has to offer. The Twin Lakes area is seeing excelerated growth and more recreational users, making the work of the Twin Lakes Improvement Association (TLIA) an important element

in delivering its mission to protect and preserve the historical and natural resources of Twin Lakes. Water quality and wildlife habitat are a primary focus within the watershed. This organization is not a homeowners association. It is a 501 3 c non profit organization of concerned citizens who have a history of working with the various state agencies to protect TLIA's 1906 water storage right which is designated for recreational use and wildlife habitat.

This year the snow pack melted off early. In addition there has been very little spring rain making the water shed dry and vunrable to wildfire. Please be mindful moving into the summer fire season especially with fireworks.

Throughout the newsletter, you will find updates on the progress of the projects benefiting the entire watershed. I invite every reader to consider an annual membership to this worthwhile organization. You can join using the application at the back of the newsletter for is nominal fee of \$20.00. This membership fee helps with operating costs.

TLIA has received the permit for the channel restoration project. TLIA will also be doing a significant amount of fundraising for the channel restoration project, asking everyone to join in the cause to raise the necessary funds. The details for the project and fundraising are available within the newsletter.

Our Annual meeting is on July 10, 2021. Please save the date and plan to attend this educational and informative meeting. TLIA will arrange to practice social distancing . I look forward to your participation.

I want to thank members of TLIA and volunteers who, support financially and provide materials for projects impacting the water quality of Twin Lakes. We are stronger together delivering our mission and making a difference for future generations.

Best Regards Debbie Andrews President TLIA

Annual Meeting

July 10, 2021

We are inviting all association members, property owners, the general public and guests to attend the Twin Lakes Improvement Association's annual meeting on Saturday, July 10, 2021. Sign-in is at 9:00 AM. There will be booths with a variety of information, so come early to check them out. The Actual meeting goes from 10:00 to 11:30 AM. The meeting location is at the Twin Lakes Elementary School, located at 5326 West Rice Road, in Rathdrum.

This annual meeting provides an opportunity to address issues and concerns with the Board of Directors. To facilitate this process, please send questions in advance of the meeting, so the board can be prepared to address your questions. Please mail to TLIA, P.O. Box 620, Rathdrum, ID 83858, or e-mail us at twlia@hotmail.com.

If you are concerned about social distancing at our Annual Meeting please send association dues through the mail ahead of the meeting. Thank you!

Annual Meeting – Speakers

Paul Buckland - Inland Empire Paper Company will talk about forestry and conservation.

Doug Jane & Mike Knowles - Will discuss the history of our lake management plan and update us on the

Chanel Restoration Project and fundraising efforts.

TLIA Board Elections

Elections for five (5) positions on the TLIA Board of Directors will take place at the annual meeting. We are looking for members who can dedicate time and energy to support the goals of our lake association and projects. If you are interested in becoming active on the Board or know of someone who is, please contact your Board President: Debbie Andrews at cell #724-553-8779, or Vice President: Pat Miller at cell #208-660-3097.

4th of July Boat Flotilla!

Come join this year's flotilla on Sunday, July 4th 2021, starting at 11:00am. The flotilla will begin on Upper Twin Lake's public boat launch. Decorate your boat and join your neighbors on the water this 4th of July. The annual flotilla is enjoyed by so many people who live and visit Twin Lakes. The narrows is wide open so we hope you will plan to travel both lakes. Depending on the water level, use caution going under the bridge from the channel area into the lower lake.

This event has a history dating back to the 1900's. Your TLIA Board wishes to remind participants; although your association does not organize the boat flotilla, we proudly support this grassroots participation in celebrating on a local level our country's independence.

Womack Family Twin Lakes Memories

These are some of the memories of our son, Ed Womack at the lake:

Ed's Story

Some of my best memories of growing up were the times spent at our family's cabin at Twin Lakes. The cabin, on lower Twin, was owned by my maternal grandparents, John and Georgia Bowker, and was originally a smaller structure with a rock fireplace in the living room that my grandfather had built. I remember him collecting thin lodge pole pine

logs and peeling the bark off before he placed them along the ceiling of the living room to cover the paneling seams. The front porch was screened in back then and the cabin had a tin roof. We often found ourselves out on the porch in the evenings playing cards or board games as we visited about various things. The porch was particularly exciting during those wonderful north Idaho thunder and lightning storms as we listened to the deafening rattle of rain on the tin roof and waited for the loud clap of thunder after the bright flash of light. Many a night I fell asleep to the patter of rain on the roof.

The list of experiences at the lake is long but some of my favorites were the rights of passage as a young boy swinging on the "Tarzan Rope" down on lower Twin. I remember this rope as a lake icon and it was always something we had to do at least once while we were there. I remember how difficult it was at first to muster the courage after first carefully climbing up the trunk of the tree while hanging onto the rope. It seemed it took forever to talk myself into trusting the rope, then going off the side of the trunk, screaming, as I sailed out over the water, timing my release from the rope then plunging into the water. What a thrill. That same feeling was mirrored by learning to climb and jump off the rocks across from our cabin. At first, starting with the lower level jumps but eventually talking ourselves into the very top. Boy, that was sure a long way down to the water!

I learned to snorkel at the lake with my dad and grandpa. One of my favorite areas was the channel between upper and lower Twin where all the lily pads grow. It was my own

private water jungle to explore and the thick muck of the bottom mud never seemed to bother me as I dove under the lily pads to look at fish and chase turtles. My dad, grandfather, and I would often go down at dusk and fly fish for crappie off the bridge using pork rinds on our flies. Back then the crappies were as big as small dinner plates and we would take the fish back to the cabin, clean them, then cook some of them in foil with salt and butter and place them in the campfire. They were so tender and tasty.

I learned the value of working hard to make some money at the lake also. We would make trips down to Miley's store for gas and supplies. I vividly remember the narrow aisles of the

store with shelves lined with any and everything you might need. My favorite location in the store was the glassed-in counter where Mr. Miley kept all the penny candy. My dad and grandfather taught me how to catch night crawlers in the lawn at night. We would use those for our own fishing but I became quite adept at catching the slippery worms, walking ever so softly on the grass so as not to scare them, using my dim flashlight to expose the glint of the slime on their sides, then quickly grasping the worm and gently pulling it out of its hole. I made my first business proposition by asking Mr. Miley if he would buy worms from me. Each summer, I would spend several hours hunting worms at night, placing them into a bucket with moist dirt, then taking them down the next day in our little motor boat to Miley's where I would count out each worm for him and give him the grand total. My record catch for him was fourteen dozen worms. That's 168 night crawlers! My reward was a sack of candy that would last me through our vacation and extra spending money to keep.

My wife Allison, and I, have cherished our times at the lake as our kids have learned about and enjoyed the traditions of Twin Lakes. Though Mr. Miley has passed, the cabin is a bit nicer, the fish are smaller now, and the original Tarzan Rope is gone, the relaxation, fun, and enrichment for our family still occurs each and every time we get out of our car after traveling and take in the scent of the pines as we walk down the steps to the cabin.

Sonya's Story

My first visit to Twin Lakes was when I was 11 and we had rented Lilac Lodge for two weeks. It was across the road from Mileys store. I made friends with Miley's daughter Mickey and we swam at the boat dock there. My sister loved the penny candy there. We stayed there for another summer and looked for a cabin to buy.

At that time the only boats were the "can't sink em" and a five horse motor was a luxury. Usually we rowed around, We found a small cabin at an area called "Silver Sands." It was west of the Lumber Mill. At that time there was the mill and a dropping pond where they unloaded the logs. Also, several log booms in the area where the fishing was great. There are still lots of sunken logs in that area. No bridge then and

a good flow of water through the channel.

We bought our cabin in 1949 and enjoyed swimming and fishing and also making a road into our cabin from the road above our cabin. It happened as I began High School we spent a whole summer at the lake. I met a girl from my home room whose folks had just bought the cabin next to Twin Echo owned by Gordon and Glenn Shern. We met lots of friends and had fun times at the Rec Hall above the resort cabins. I worked that summer for them cleaning cabins, First time I had ever cleaned toilets!

Winters we skated, Sometimes the lake was clear and smooth and you could skate all the way to Excelsior Beach. We also spent time watching Miley cut ice from the lake into blocks to put in the ice house next to Lilac Lodge. Most of us had "ice boxes" to keep food cold. Things have changed at the lake, but we still look out on the big hill where the "hermit" used to live and watch the mood on the water. A lot of 4th of July parades and water fights that the 3rd and 4th generations are still enjoying. Our 1967 tri-hull Aluminum boat is still running and providing lots of pleasure.

Sonya Bowker Womack

2020 Pontoon Raffle Winner!

Rene La Croix TLIA Boat Raffle chair is pictured delivering the keys to Lower Twin Lake's Doug Bruegeman for the 2020 Bass Buggy 16 XL which was raffled off at the TLIA social. Doug said, "this was the best \$60.00, I ever spent."

TLIA 7TH Annual Social and Silent Auction Fundraiser

We invite you to the 2021 TLIA Annual Social and Silent Auction where we will be drawing the raffle winner for the 2021 Bass Buggy 16 XL with Mercury 50 ELPT FourStroke raffle. If you are looking to have fun on the lake and see yourself on the water in this pontoon boat; be sure to get your tickets now. You have a 1 in 3000 chance to win. All proceeds support TLIA and its ongoing efforts to care for the lake we all love.

“Pontoon Raffle”
 Raffle Drawing and Social
 Saturday, August 6th, 2021
 6:00 pm-9:00 pm
 Raffle Drawing at 8:00 pm

Pontoon Raffle Tickets are available at:

- Rathdrum Trading Post Hardware
 - Super 1 Foods, Rathdrum, Athol, Post Falls, Hayden’ and Coeur d Alene
 - Seright’s Ace Hardware
 - Twin Lakes Trading Post Gas Station
 - Moon Dollars Bistro at Twin Lakes Village
- Drawing will be held on August 6, 2021 at 8:00pm at Twin Lakes Village.

**Parks and Recreation
 New Registration System Online!**

You can now Register Boats, OHVs, Snowmobiles,

Motorbikes, or Buy an Invasive Species Sticker. You can buy your registrations and permits online, in-person at vendors, or over the phone.

1. Buy Online-

Use the convenience of the web option to renew or register boats and recreational vehicles, with this new system. Online purchases provide a temporary registration, valid for 60 days, which allows you to go and play — right away. <https://parksandrecreation.idaho.gov/registration-permits/>

2. Buy from a Vendor

More than 140 vendors in 84 communities across Idaho, Montana, Oregon, Utah, Washington and Wyoming are selling registrations and Invasive Species Stickers. Kooteani County has 14 vendors. The complete list is available at https://parksandrecreation.idaho.gov/wp-content/uploads/Vendor_List.pdf

Not all vendors can provide a sticker at the moment of purchase, However, the receipt provided allows you to go and play. Some outlets sell some, but not all, of the registration products, so please check the list.

3. Buy by Phone Call 1-888-922-6743 and a service representative will help you with the transaction.

•Agents are available seven days a week, Monday-Friday from 8 a.m. to 7 p.m., Mountain Standard Time (MST), and Saturday and Sunday, 9 a.m. to 5 p.m., MST.

From your Water District 95-C Watermaster

The winter and spring of 2020 brought lots of water to Twin Lakes. After a fairly strong spring runoff, the Flood Control District left the lake just over the 10.4 foot mark before summer. With all the rainfall and the healthy snow pack, the lake held pretty high as I released all the water allowed by decree. With these high levels, I received many comments through the summer and fall seasons. However, I must remind everyone that the Water District does not maintain the level of Twin Lakes. As watermaster, I only manage the water that flows into the system. I am not allowed to use the water stored in the lake as a reservoir. The Flood Control District has the sole responsibility to set the summer level of

the lake each year, and that level is protected for wildlife and recreation as set forth by the 1989 decree.

Your water district was also working to install some technology upgrades at the spillway last year. A new camera system was installed to monitor lake levels, gate positions, and areas around the dam in real time, as well as a new interface to operate the gate controls remotely over the internet. These improvements brought more transparency, as well as convenience, to both the water district and Flood Control District operations. Several board members now have access on their smart phones to live camera views, and receive notifications when events occur at the dam.

Finally, in order to bring our district into compliance with state recommendations, I am looking to get a good handle on who is pumping or diverting water from the lakes, creeks, or streams in our drainage this year (NOT wells or other ground-water sources). With over 350 water rights on the books, as well as all those using water without permits, the task is daunting. Please visit our website at TwinWaterDistrict.org to help us out. There is a form on the site for updating water usage. You can also fill out and mail the attached postcard in this newsletter.

Thank you, and enjoy your summer out at the lake!

Fall Wood Tour

The Fall woods and watershed Tour will be hosted by Paul Buckland, forester for Inland Empire Paper Company (IEP) September 3, 2021. IEP is a family-owned company and a Twin Lakes watershed landowner, including drainage from Mt Spokane.

Regeneration and tree planting which is done after a timber harvest. Regeneration is the process of natural seeding from shelter wood harvesting which is the result of leaving approximately 50 trees per acre at the time of harvest. The planting or regeneration immediately after planting. The process from planting to harvest of the tree is similar to any other agricultural crop, except that the forestry growth period is 60 to 80 years, whereas most agriculture areas that period is only a few months. There is a soil preparation, planting, weed control and harvest. In forestland the weed control also includes brush control. Brush is competition for young trees that shade trees from sunlight and uses soil nutrients as well as water for tree growth. Trees planted today will not be harvested in our lifetime but rather in the lifetime of our grand children's.

The climatic zone is unique in that several major trees species are native to the area, including Douglas Fir, White Fir, Larch, Spruce, White Pine and Hemlock. IEP is planting on most of the sites, a mixture of those species. The White Pine being planted is resistant to the blister rust disease which affects many trees.

The tour is an opportunity to observe the watershed and practices by professional foresters. You will also see several

of our wildlife and domestic animals. If you haven't had an opportunity to participate, I would encourage you sign up at the annual meeting to attend.

Fish Creek Restoration Project – 2021 update

In August of 2013 Twin Lakes Improvement Association received a \$319 grant through Department of environmental quality. The grant was for \$140,000.00 with a match obligation of \$56,000 from public and private support. The Fish Creek Restoration project was designed to address the bank erosions along the creek which contributed 600 tons of sediment annually to the upper Lake. The cattle were also problematic, breaking down the banks and adding organic material to the water. TLIA worked to make the project come to life with the help of hundreds of volunteers who provided thousands of hours of their time. The main portion of the project was completed in 2013. As with any large restoration project, there is always the maintenance. This ensures all the work and money expended has continued value for many years (and generations) to come. This is part of TLIA's 10-year maintenance obligation, and agreement with the English/Easterday Family when we obtained the Department of Environmental Quality \$319 Grant.

TLIA continues to perform maintenance within the project area. Volunteers helped remove thistle, which is an invasive plant, and other weeds, clear overgrown grass from around pine trees and clean up the site. Fence work was performed to move the existing fence lines in toward the stream. This allowed fenced protected areas, originally needed for construction equipment, to be returned to pasture areas needed for the cattle.

which will determine which polymers work best for de-watering the sediment and how rapidly the sediment will de-water. This sediment core sample shows over 3' of decayed aquatic vegetation rich in available phosphorus, which provides an environment for aquatic weeds and degrades water quality. It further takes away from the fish habitat reducing oxygen and warming the water temperatures.

Today, the restoration project is performing as planned. Sediment is no longer eroding the stream banks, due to the rocks, logs and thousands of plants volunteers installed. The plants and trees planted as seedlings are growing and solidifying the stream banks. This is causing shade over the water, which in turn is cooling the water. It is believed that this will affect fish habitat returning to the stream over the coming years. The cattle are restricted to the two cattle crossing to move from pasture to pasture. They have access to the water they need but no longer meander up and down the streams.

2) Conduct Water Percolation Tests – All contractors who have provided project cost estimates want more information about the ability of the sand pit area on Upper Twin Lake to adsorb the huge quantities of water, (nearly 500,000 gallons/day) required for suction harvesting. To help determine the capacity of the sand pit to uptake this much water, the channel committee conducted water percolation tests at four locations throughout the sand pit. The results showed, at least near the surface, the coarse sand can adsorb the amount of water necessary. The committee will also engage a licensed hydrologist to ensure the sand pit can continue to uptake the water over the expected 20-to-30-day life of the project.

In 2017, the Idaho Department of Environmental Quality allocated an additional \$1,500 towards the Fish Creek project. Additional plants and material were purchased which will be installed at the project site over this summer. Some repairs were identified in 2018 and 2019 the maintenance program continued with moving fencing, repairing crib walls, mowing down high grasses within the project area, and adding additions stabilization along the creek. We will also work on moving additional fencing to return more area to pasture. The English/Easterday family have approved TLIA's 2021 plan for the Fish Creek work. We express our gratitude to them for allowing our conservation project. Throughout the season there will be workday opportunities; volunteers are always welcome to help on the site. We will share the workday activities at the upcoming annual meeting.

Spring 2021 – Channel Restoration Project Update (D. Jayne)

The Idaho Department of Lands approved the necessary permits to implement the channel restoration project. The Channel committee has continued to identify the best ways to implement this project on behalf of the Twin Lake Neighbors, Friends, Anglers and recreational users of the lake. In addition to actively fundraising for the capital needed, TLIA has principally undertaken two actions to move the channel project along.

3) Fundraising – TLIA began its fundraising campaign to raise \$2000,000 last November. To date the Association has raised \$93,859 toward our goal of \$200,000. TLIA is targeting a late fall implementation if funding is secured. The board is encouraging participation in this worth while effort. TLIA needs your help to get this done! All it would take is 500 Twin Lake Neighbors, Friends, Anglers and Recreational Users

1) Obtain Additional Bid – The Channel committee decided to obtain an additional contractor bid for the project. TLIA retained the services of ENVIRODredge, a Texas company with extensive experience in projects our size. They visited the site in mid-May and will have a firm bid for the project to us by May 28th. During their visit, they also collected a composite sample of sediment from the channel

to donate \$400.00 to reach the goal of \$200,000. If you want to contribute, and feel you need to budget, consider spreading the cost over several months. It is easily set up through our web site. Twinlakesimprovementassociation.org. Several property owners have come forward with \$400.00 donations; however even just \$50.00, \$100.00 or more can make a difference. Please donate today!

Your support will help remove the pollution and nutrients (Phosphorus) from the Twin Lakes watershed system, improve the fish and wildlife habitat, and have a safer boater experience in the constricted area of the channel. Your generous donation can provide the support necessary for making this project a reality. This project will allow you and your family to enjoy and fully use all the recreational opportunities Twin Lakes has to offer!

If you have any questions about the project, please contact Mike Knowles Channel restoration Project Committee Chairman, (at 509)-863-4359 or Doug Jayne, Channel Restoration Project Co-Chair (509) 710-7188

Additional information on the channel project will be provided at the Annual Meeting on July 10, 2021.

Historical Map of Twin Lakes Available

By popular demand, TLIA continues to offer a beautiful map of Twin Lakes suitable for framing. It highlights important historical locations along the lakes and makes a great addition to any collection. It will be available at our annual meeting for a tax-deductible suggested donation of \$10.00. The maps are also available at the Rathdrum Trading Post gas station located right at the entrance to the village.

Aquatic Lake Rake Loan Program

Is the end of your dock a mess of aquatic weeds poking up out of the water, so the kids/grandkids don't want to swim there anymore? If so, do you need a Lake Rake? Twin Lakes Improvement Association (TLIA) HAS THEM!

TLIA has purchased three different types of lake rakes available for loan, with a little effort on your part, you can rid the swimming area around your dock of unsightly aquatic weeds. Your kids/grandkids will love you for it. And, you will be doing your part for the environment as each weed removed from the lake improves water quality by removing nutrients that eventually are returned to the lake when the plants die and decompose.

No need to use harmful chemicals to maintain lakes – these unique rakes give provide a natural alternative to removing weeds and algae. Each of the rakes has an extension handle allowing you to reach 15-20 feet out from your dock to cut and remove weeds.

We encourage everyone who has aquatic weeds growing around their docks or in front of their lake home to remove them from the lake.

The rakes can be borrowed from TLIA, the rakes will be available at the annual meeting to view. We will go over the loan process at the annual meeting on July 10th, 2021.

1. Must be 19 years or older to participate. 2. Twin Lakes Improvement Association board members, raffle committee members and their immediate households are not eligible to participate. 3. Prize will not be awarded in cash. 4. Prize winner is responsible for any taxes, license fees, registration fees, insurance, title transfer fees, any other transfer fees imposed for the title and possession transfer and any sales tax associated with the prize title transfer and ownership. 5. Prize winner must provide TLIA with a Request For Buyer Identification Number and Certification (Form W-9) prior to title transfer. 6. No fewer than 1000 and no more than 3000 tickets will be sold. If fewer than 1000 tickets are sold, all ticket purchases will be refunded. In the event that fewer than 1000 tickets are sold TLIA will have no responsibility beyond the refund of the ticket purchase price. 7. The official drawing will be held at Twin Lakes Village on August 6, 2021 at 8:00 p.m.. 8. In the discretion of TLIA an affidavit of eligibility may be required prior to the prize title transfer.
